DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 14, 2005 has been entered.

Allowable Subject Matter

2. Claims 2-30 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record, Eisenbrey et al. (U.S. 5,516,105), Powell (U.S. 6,030,290), and Sagawa et al. (E.P. 0,903,169), lacks disclosing, teaching, or fairly suggesting "a signal generating device having a first curved surface, a second curved surface opposing said first surface, and a retaining device retaining said first curved surface in a palm of a game player in a glove fitting manner permitting transfer of a hitting motion and a swinging motion imparted thereto by said game player" and "a first sensor for sensing an impact of the signal generating device requiring an impact contact of the second surface of the signal generating device with an external object, said first sensor generating a first signal in response to said hitting motion of the game player effecting said impact contact of the second surface of the signal generating device with the external object when said impact is sensed while the game player is in motion with said signal generating device" as similarly recited in independent claims 21, 15, 16, and 20.

Art Unit: 3713

The instant invention is deemed to be an improvement over the prior art of record. The improvement comprising utilizing signal generating devices to impart at least one of a hitting and swinging motion in response to an instruction of motion displayed on a game display screen, the player is required to time the motion of the signal generating devices in turn with the instructions displayed, and where the player can freely move near and around the game system while playing the game. In addition, the instructions of motion displayed on the game display screen are successively renewed; therefore, the player is constantly required to prepare for the next motion timing instruction on the game display screen. These features make the game highly interesting and enjoyable to game players.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Terminal Disclaimer

4. The terminal disclaimer filed on February 14, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. 6669563 has been reviewed and is accepted. The terminal disclaimer has been recorded.
